Could I get the data for the response times for MVFD? Specifically, I am looking for:

- 1) average response time for the last year. **Average 17 Minutes**
- 2) average response time for when the station is staffed. **If Fully Staffed 3 minutes**
- 3) average response time when not staffed: **20 minutes**
- 4) percent of time MVFD has if station staffed on site vs a local FF staying at their home in the district. **This is only accurate if we have double staffing at the station, if we have split staffing, refer to #1. (3) minutes if double staffed. Double staffing occurs around 25% of the time.**

Also, would like the data and your calculations for your cost per call for both fire districts, please. The data set I am looking for is the last year. **The cost per call is the total budget divided by the annual number of runs.**

Additionally, for the MVFD financials, I would like the last three years budgets, what was spent out of the line items and what was carry over. See below for clarification of what I am looking for - requesting copies of 2024 and 2023.

Why is the MVFD public hearing being held outside the district boundaries? What was the rationale for that?

The reason that the Merger Meeting is being held in Brenda is due to the fact that it is a joint meeting, such as the one that was held in Salome at the Community Center in August. The individuals from Quartzsite traveled to Salome for this meeting, so to try to make things fair, we split the difference and are holding the meeting in Brenda at Desert Gold, instead of Quartzsite. DG has a great facility and an outstanding sound system as well.
